After reviewing applicant's remark on 4/30/09 and reference carefully, the "bolt 130E in combination with 112E and the elastic film 400E as shown in Figs. 20-24" in Yoshida is strictly limited to a "the elastic film 400E must be firmly fixed in place relative to the probe pins 3aE". Therefore, Yoshida teaches away from the limitation of "at least one adjustment element provided on the probe base configured to variably adjust a pressure on the flexible compression arm against the plurality of probe pins during testing of the LCD panel such that different pressures of the flexible compression arm against the plurality of probe pins produce different contact angles of the probe pins with respect to the test points" as indicated in the claim 7; and Yoshida teaches away from the limitation of "at least one adjustment element provided on the probe base for adjustably increasing and decreasing a pressure of the flexible compression arm on the plurality of probe pins during testing the LCD panel so as to adjust a pressure of the probe pins on the test points" as indicated in the claim 39.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
